

©2007 CAMSS Shelters

APPENDIX A Revision A		ACCESSORY PRODUCT DATA SHEET
Company		CAMSS Shelters
Part Number or NSN		CAMSS-HIT-CCR01
Specifications as applicable		CAMSS Medium Shelter Composite Container
Insulated Liner		N/A
Insulated Flooring		N/A
Solar Shade/ Camouflage Netting		N/A
Weight (Unpackaged) (lb.)		350 lbs
Color in accordance with FED-STD-595		
Special/Additional Features:		<p>The CAMSS Container, CAMSS-HIT-CCR01, is a composite container that measures 8' x 7' x 4'. The container is lightweight but very rugged for multiple deployments. The composite container is forkliftable, and stackable. It is capable of holding up to 5,000lbs of shelters. The CAMSS Container has been approved by US Air Force Load Masters for air transport. It includes a recessed breather valve for controlled breathing during normal cabin pressure changes in aircraft. Two containers may be stacked for C130 transport in the wheel well position. Included on the container are recessed handles and ten butterfly latches. The Air Force has tested the CAMSS Container in temperatures ranging from -25 to 125 F with full solar load without deforming.</p>
